

Integrated Project Teams

Patty Bubar

**Associate Deputy Assistant Secretary for
Integration and Disposition**

**EM Project Management Workshop
February 14-15, 2001**

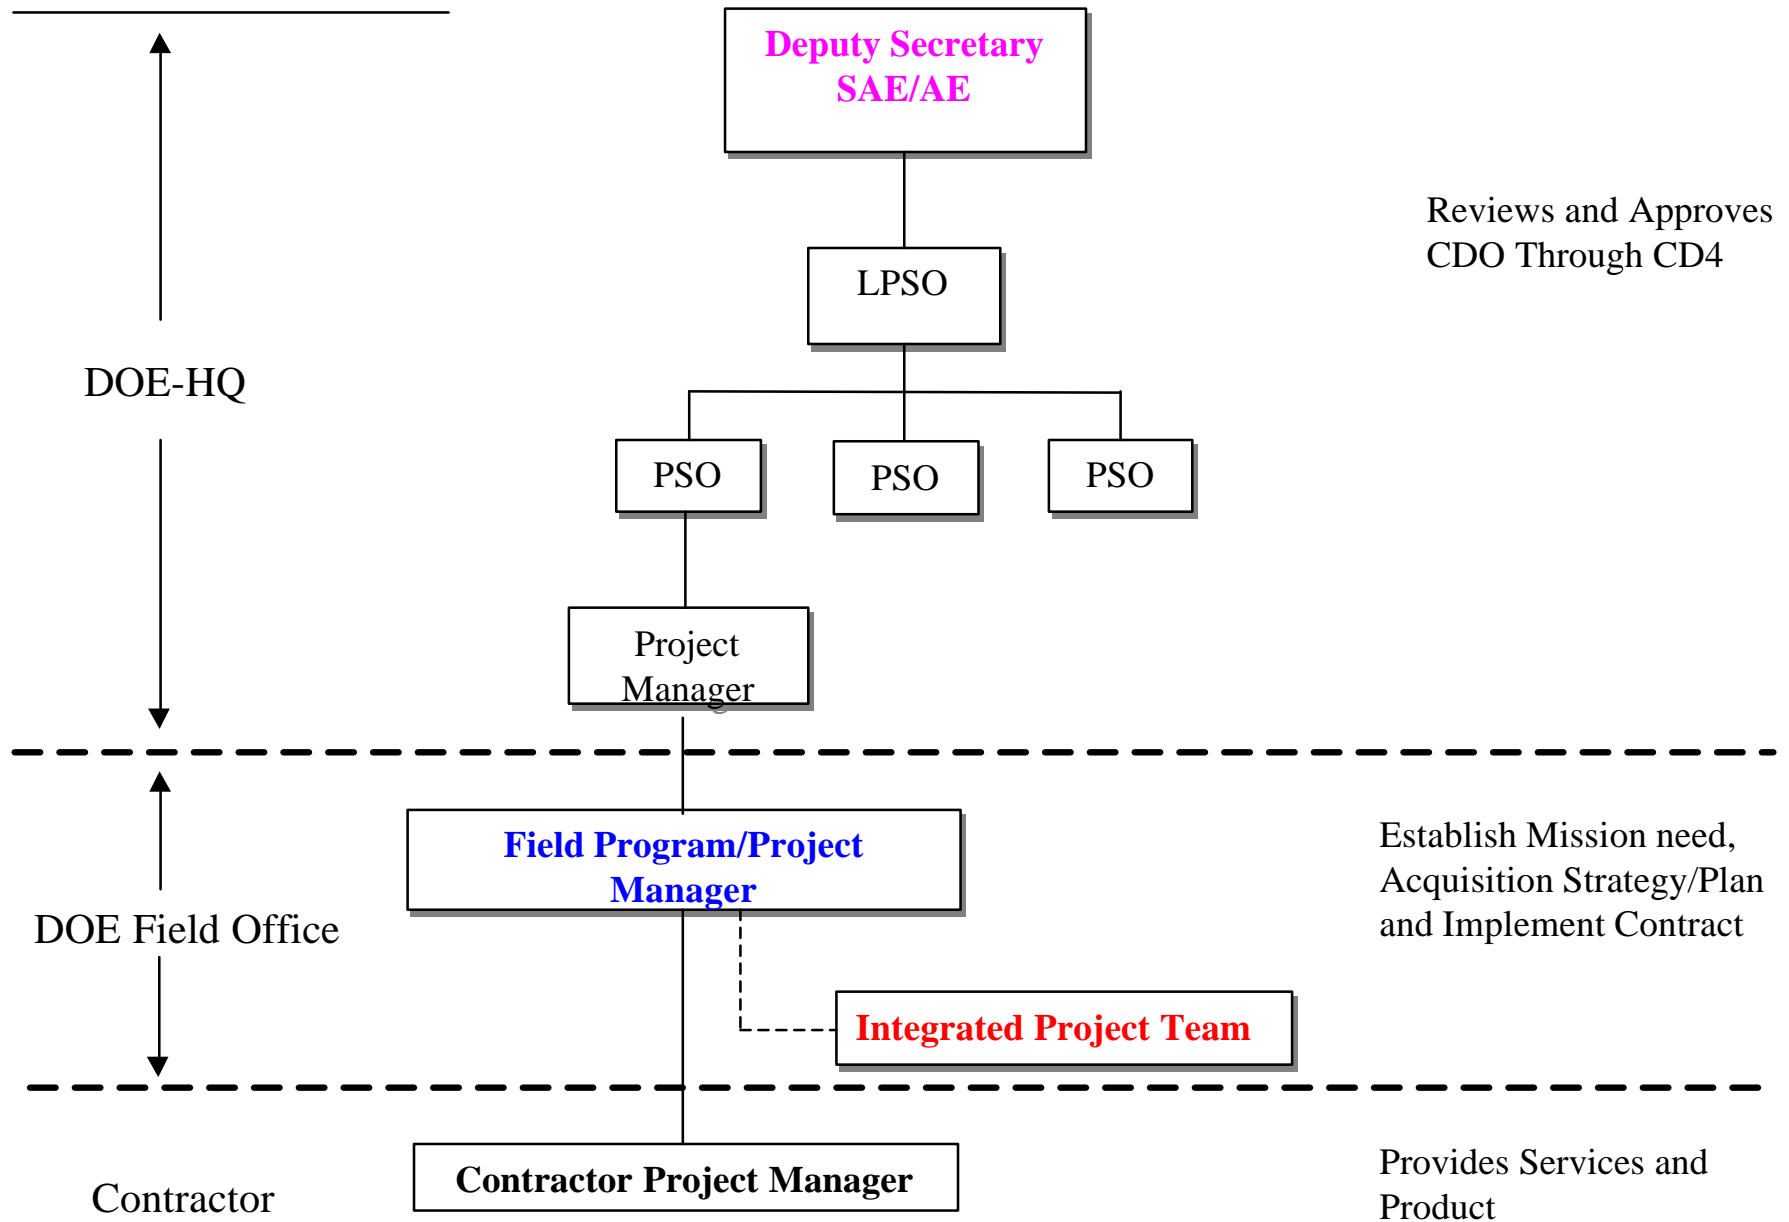

Background:

- Cancelled DOE Order 4700.1 required a similar group to the IPT prescribed by DOE Order 413.3
- Federal acquisition requirements (FAR) and the DOE acquisition requirements (DEAR) implement acquisition teams
- FAR Subpart 1.1, A.2.iii and iv provides guidance on acquisition teams and the role of an acquisition team

Integrated Project Team Functions

- IPT's are required for DOE direct acquisitions
- IPT's assist in pre-conceptual planning
- IPT's develops the acquisition plan
- Program/Project management decides how an IPT is used prior to and during a project
- Program/Project management decides IPT membership

Authority Chain

Case Studies

INEEL

Utilized IPT type groups prior to issuance of DOE Order 413.3 and is currently using an IPT for a major DOE acquisition (Dry Cask Storage Project)

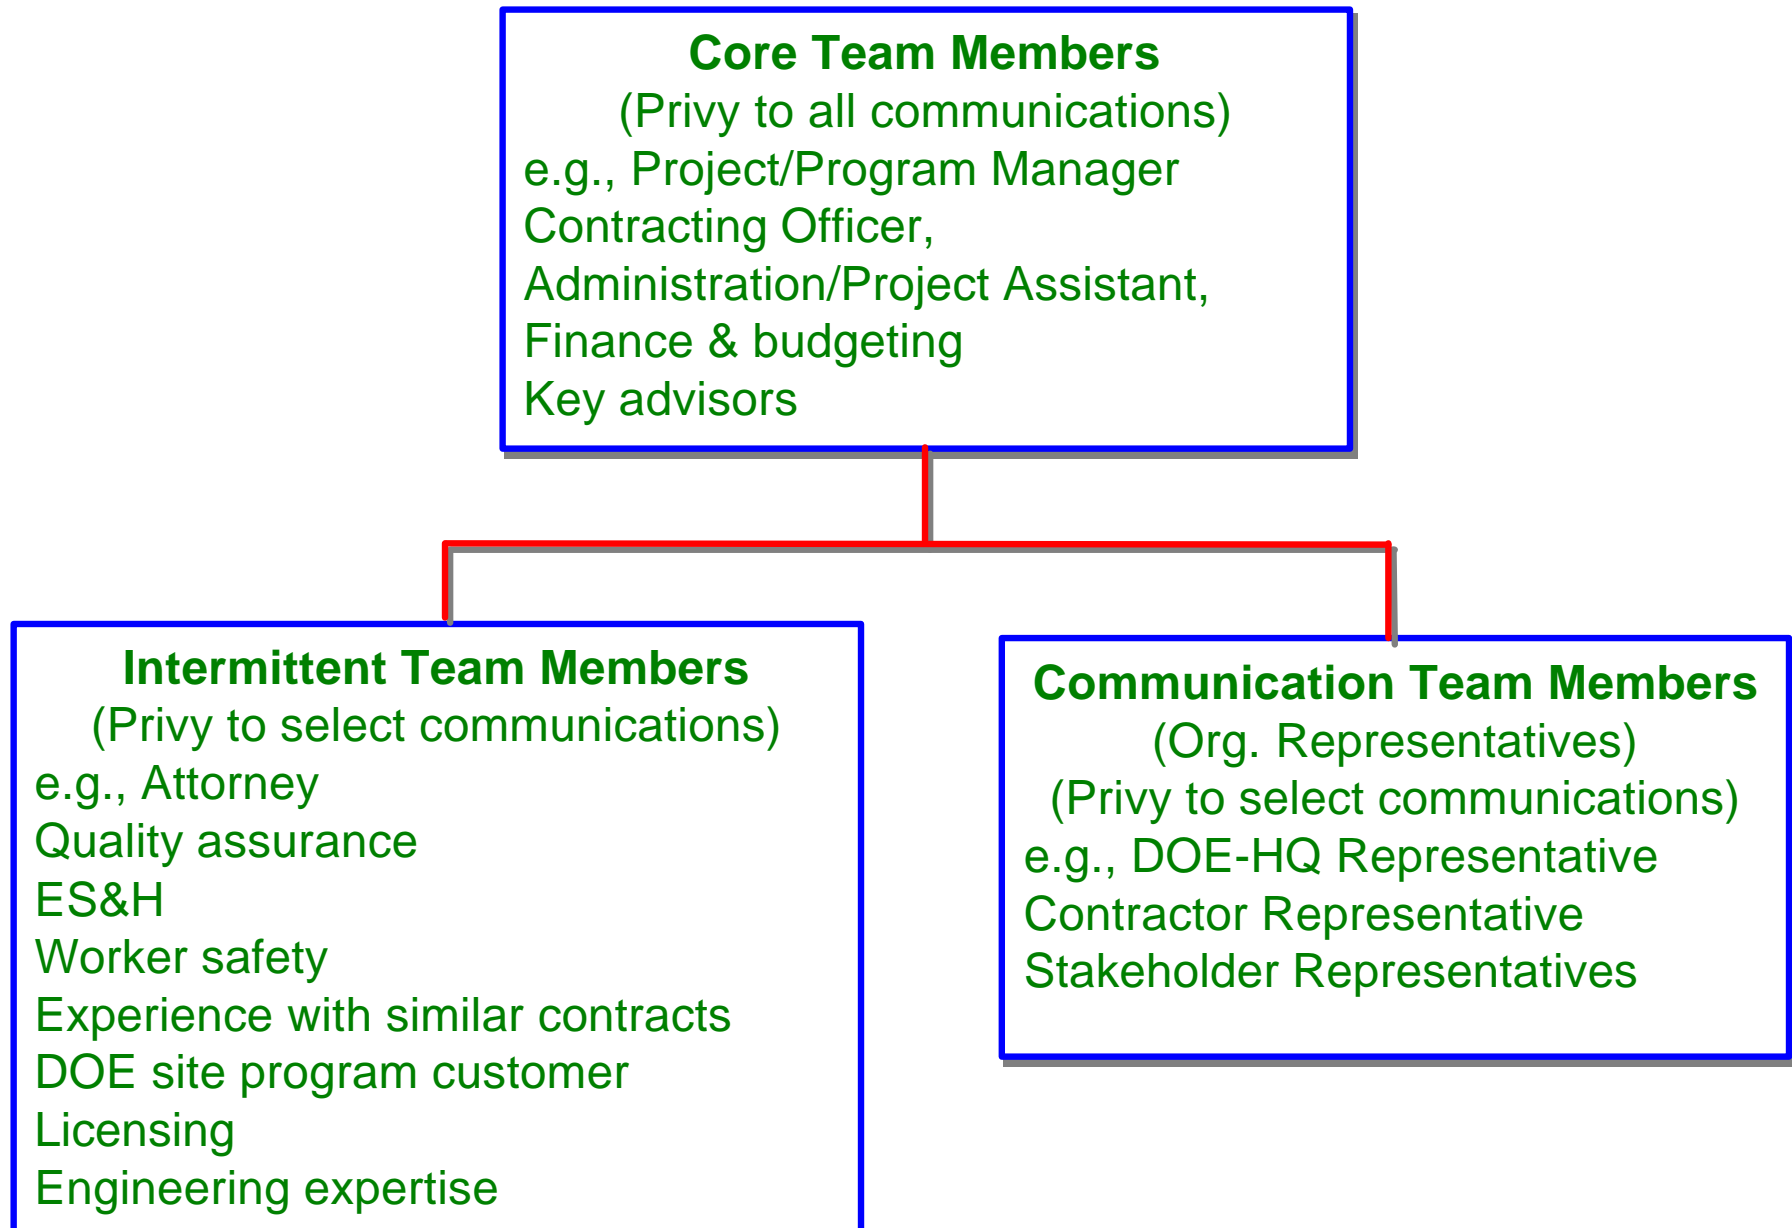

WIPP

WIPP utilizes IPTs to focus on project success. This includes certified PMPs which lead each project, having clearly established lines of responsibility, single point accountability with aligned resources

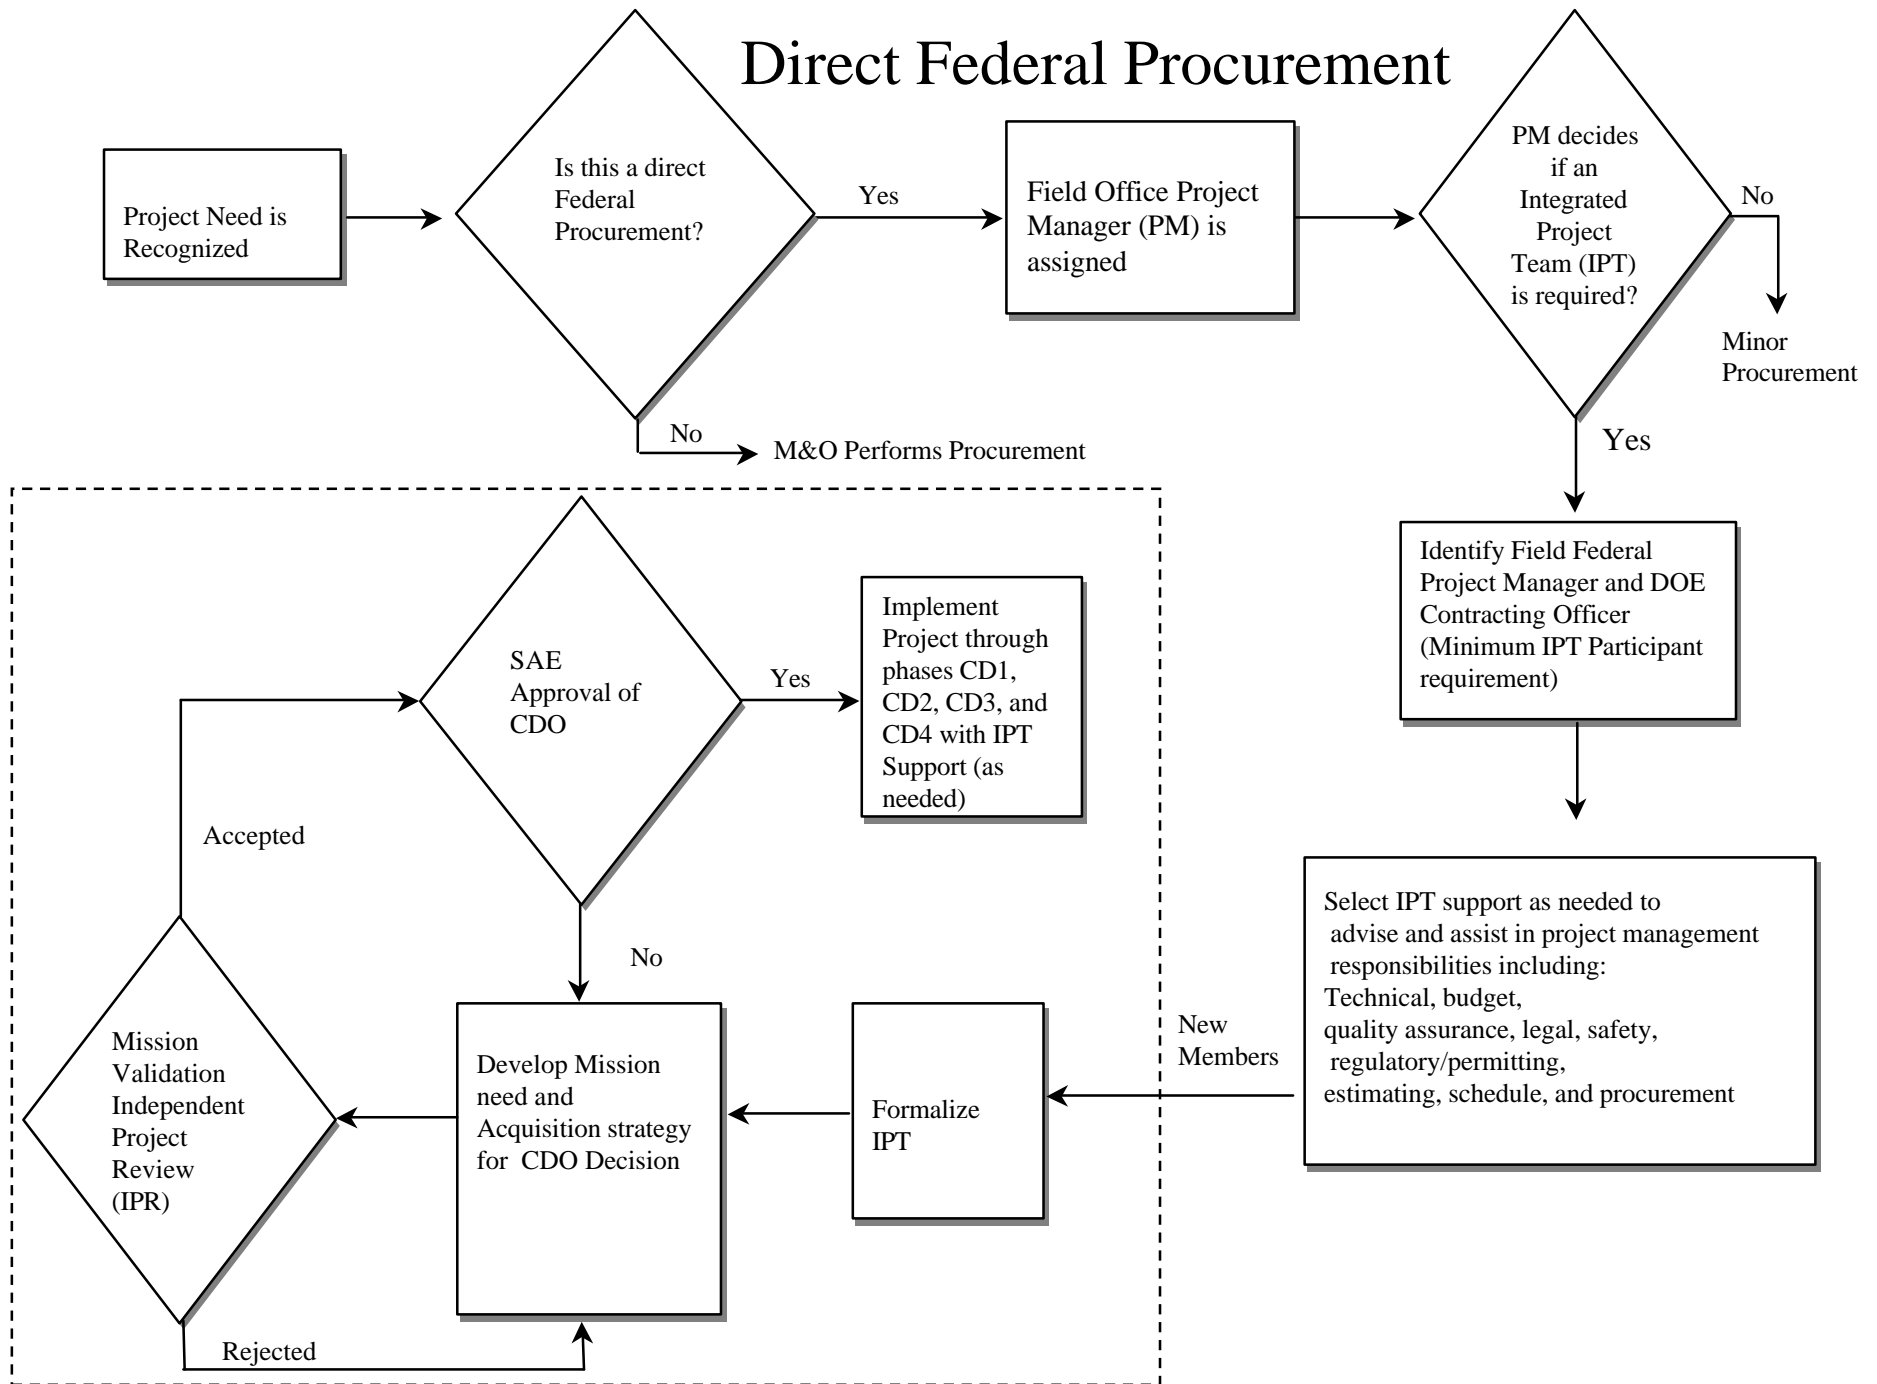

Rocky Flats

Utilized IPTs in the development of the RF integrated closure project baseline which projectizes DOE activities required under closure.

Suggested Integrated Project Team Components

Direct Federal Procurement

Your Thoughts

- Is your site implementing IPTs or IPT type groups for DOE acquisitions
- How do you use IPT's at your site and who makes up the IPT's?
- Is something missing for sites to implement IPT's
- Do you think developing an IPT guidance document is necessary? GIVEN THAT THE FAR AND DEAR PROVIDE GUIDANCE DO WE WANT THIS QUESTION ASKED?
